Conveyor Systems Ltd offers a wide range of pallet handling conveyor products that can accommodate both chep and euro style pallets in any orientation, whilst integrating with other equipment.

Systems can be based on modular designs to provide a simple and cost effective scheme or alternatively, a bespoke solution can be proposed for non-standard applications.

- Faster Transit times
- Reduce forklift movements thus lowering costs and increasing safety
- Providing constant feeds to/from machines
- Low Maintenance
- Both modular and bespoke systems available
- Most pallets/cage sizes/stillages and weights accommodated
- Pallets can be accumulated on conveyors
- Improved savings compared to manual operations
- Suitable for use in cold stores
- Move pallets safely between floors
